nel cuore della tradizione

Quante volte avete pensato di sostituire il vecchio rubinetto di casa con un moderno e pratico miscelatore? L'indiscutibile praticità e convenienza, il maggior risparmio nel consumo d'acqua calda, uniti ad un moderno design, vi avranno spesso fatto riflettere sulle possibilità di sostituire la vecchia rubinetteria con un miscelatore monocomando. **Cusio Collection** è la prima gamma di miscelatori monocomando universali applicabili alla vecchia rubinetteria ad incasso senza danneggiare le piastrelle, grazie ad un sistema di raccordi brevettato ed agli interassi regolabili.

How many times have you thought about changing the old house taps for a modern and practical mixer? The unquestionable practicality and convenience, the increased saving in the use of hot water together with a modern design, will have often made you think about the possibility of changing your old taps for a single control mixer. **Cusio Collection** is the first single lever mixer, universally compatible with any built in taps without damaging the tiles thanks to a patented pipe fitting system and an adjustable central connection section.

Come fare? Chi desidera sostituire la vecchia rubinetteria ad incasso con un miscelatore non ha alternative: il muratore, l'idraulico ed il piastrellista per risistemare il bagno, senza contare la polvere ed il disagio causato dai lavori. Una soluzione talmente complessa e costosa da scoraggiare chiunque.

How to do it? Whoever wants to replace old built in taps with a mixer normally has no alternative: a builder and a plumber are needed to install the new taps. Then there is the dust and inconvenience of work. Moreover this operation is so complicated and expensive that it discourages anyone.

L'alternativa: in un intervento unico ed economico, CUSIOMIX viene installato senza dover intervenire sulle vecchie tubazioni, ma semplicemente smontando il vecchio rubinetto e montando il nuovo.

The alternative: in a single cheap operation CUSIOMIX can be installed without the necessity of altering the old piping. This is done by simply removing the old taps and replacing them with the new one.

fasi di montaggio assembly stages

1. Gruppo incasso esistente.
Existing built-in tap.
2. Smontaggio del vecchio rubinetto, controllo filettatura e passo del vecchio vitone.
The old taps are removed and the thread and pitch of the internal screw section is checked.
3. Montaggio del vitone brevettato "CUSIOMIX" corrispondente alla vecchia filettatura.
The patented "CUSIOMIX" internal screw section corresponding to the thread of the old section is inserted.
4. Montaggio dei "Braccetti CUSIOMIX" con interassi e filtri di depurazione.
The connecting arms of the "CUSIOMIX" with their adjustable central section and purification filter are put into place.
5. Assemblaggio del "Corpo CUSIOMIX" e della bocca di erogazione alla vasca.
The body and mouthpiece of the "CUSIOMIX" are then assembled and put into position.

CUSIO

Da oggi è possibile sostituire impianti di risciacquo a passo rapido con una moderna ed economica cassetta per WC senza doversi rivolgere al muratore, all'idraulico, al piastrellista e senza naturalmente il disagio causato dai lavori; la soluzione è **Cusio Rapid KIT**, che viene **sostituito al vecchio impianto con un unico e veloce intervento**.

It is now possible to replace a rapid-pitch rinsing installation with a modern and economical WC tank without recourse to the maison, the plumber and the tile maker and of course without any of the related inconveniences. **Cusio Rapid KIT** is the perfect solution, which **makes the replacement of the old installation a simple and quick operation**.
